Kill Confirmed

٢٦ آب, ٢٠٢٢ ٠٣:٤٤ ص

Install:

1. download and Install scripthookv + Scripthookvdotnet
2. create a scripts folder (named scripts and not Scripts) if you havent got one already
3. install LemonUI(if you havnt already got it for SHVDN2) there is a download link in the text file of the zip, copy the url into a browser, then a zip will be downloaded, drag the CONTENTS of the SHVDN2 folder into scripts
4. drag HKHModHelperNew.dll and folder into scripts
5. drag KillConfirmed.dll, KillConfirmed.pdb and KillConfirmed folder into scripts
6. If you havent already got a mods folder create one
7. if mods folder does not contain update folder, copy and paste update folder into mods
8. drop the KillConfirmed.ytd into mods\update\update.rpf\x64\textures\script_txds.rpf\
9. Launch game
